## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

Claims 1-39 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The examiner is not able to understand what is meant by the term "workpiece," used in each of the independent claims. The term as used in the specification (paragraph spanning pages 7 and 8, for example) seems to be used to describe an ordinary semiconductor substrate, or an SOI substrate. However, this term is most often used in the art to describe a temporary substrate, i.e., a substrate that is used during the processing of the overlying devices, and then removed. So the examiner doesn't know whether to search for a completed device, and a method for making a completed device, or whether to limit the search to intermediate products involving a temporary substrate. Also, the term could be describing a printed circuit board, or some other type of substrate other than a chip or SOI. So does the term "workpiece" mean any substrate at all, a temporary substrate used only during processing, or a substrate bonded somehow to the overlying devices? Or is the intention to limit the scope of the claims to semiconductor and SOI substrates?

Any inquiry concerning this communication or earlier communications from the examiner should be directed to S. Crane, whose telephone number is (571) 272-1652.
